

NATTHAKAN JAMRATPHUM

Technical Business Analyst Intern

✉ natthakanjam26@gmail.com 📞 FAYRESU 🌐 Natthakan Jamratphum ☎ 082-150-5710

📍 Nakhon Pathom, Thailand

An ambitious Software Engineering student seeking a Business Analyst (BA) Internship. Offers a unique blend of technical expertise as a Frontend Developer and a strong understanding of system analysis. Experienced in bridging the gap between user experience (UI/UX) and backend infrastructure. Eager to leverage technical knowledge and analytical skills to deliver user-centric and high-quality software solutions.

EDUCATION

Bachelor of Science in Software Engineering 2023 – 2027
Nakhon Pathom Rajabhat University
GPA: 3.89

TECHNICAL SKILLS

Technical Skills: Jira, Figma, Postman, Docker, Git/GitHub, Jenkins (CI/CD)
Business Analysis: Requirement Analysis, Workflow Analysis, Use Case Diagrams, Document Review, Process Validation
Tools: Jira, Jenkins (CI/CD), Git/GitHub, Docker, Figma
Soft Skills: Attention to Detail, Analytical Thinking, Communication, Problem Solving, Collaboration
Frontend Development: React, JavaScript, TypeScript, HTML5/CSS3

ACADEMIC PROJECTS

Store mate (E-commerce Web Application) 12/2025 – Present
Gathered and analyzed business requirements for core e-commerce features including product listings, shopping carts, checkout flows, and LINE OA integration. Responsibly developed modern, responsive user interfaces to optimize user experience, utilized Postman to verify API integrations, and managed project tasks and requirements within the team using Jira under an Agile framework.

Real-time Chat Application (MERN Chat)
• Translated user needs into clear functional specifications for dynamic messaging, online status tracking, and session management. Implemented the real-time chat interface focusing heavily on responsive web design using the MERN stack, and conducted integration tests to verify layout stability and user experience under active connections.

SE Restaurant
• Modeled and mapped out operational workflows for a restaurant system to transform business logic into structured RESTful API requirements. Developed the responsive frontend layout for both customers and staff, while configuring containerized environments using Docker to easily debug and analyze system integration.

EXPERIENCE

Student Loan Office (กยศ.) 2023 – 2026
• Reviewed and verified over 200 student loan applications and supporting documents with high accuracy.
• Checked document completeness, data consistency, and compliance with required guidelines and procedures.
• Coordinated with students and internal staff to clarify missing information and resolve complex document-related issues.
• Developed strong analytical thinking, attention to detail, and problem-solving skills through daily workflow and document validation tasks.

CERTIFICATIONS & TECHNICAL TRAINING

SQL Basics — BornToDev, Certificate

Automation Testing Robot Framework — Cloudnatician (CloudNC), Technical Training

Automating Pipelines with Jenkins (CI/CD) — Technical Training

Code Quality & Security Gate with SonarQube — Technical Training

Web Security Implementation (OWASP Top 10) — Technical Training

API Gateway and Software Architecture Fundamentals (Kong API Gateway) — *Certificate*
