OBJECTIVE

Highly analytical Software Engineering student with a strong foundation in translating business requirements into technical specifications. Experienced in analyzing user workflows, mapping system processes, and ensuring data integrity across full-stack applications. Combines rigorous document auditing experience with excellent communication skills to act as an effective bridge between business users and technical development teams. Active seeking a Business Analyst internship to drive impactful digital solutions.

EXPERIENCE

Documentation & Student Support Assistant
Student Loan Office (ณฐพ.), Nakhon Pathom Rajabhat University

- Reviewed and verified over 200 student loan applications and supporting documents with high accuracy and compliance.
- Audited files for data consistency, completeness, and adherence to structural protocols.
- Coordinated closely with students and internal departments to resolve missing information and document discrepancies.
- Developed exceptional attention to detail, analytical skills, and communication capabilities that translate directly into auditing code quality and debugging software.

EDUCATION

Bachelor of Science in Software Engineering 2023 – 2027
Nakhon Pathom Rajabhat University
GPA: 3.89

TECHNICAL SKILLS

Technical Skills – JavaScript, TypeScript, React, PHP, SQL (Basic)
Frontend Frameworks & Libraries: – React, HTML5, CSS3, Responsive Web Design
Tools – Jira, Jenkins (CI/CD), Git/GitHub, Docker, Figma
Soft Skills – Attention to Detail, Analytical Thinking, Communication, Problem Solving, Collaboration
Business Analysis & Product Design: – Requirements Gathering, Gap Analysis, User Stories, Process Mapping (Workflow/Flowcharts), UI/UX wireframing (Figma)

CERTIFICATIONS & TECHNICAL TRAINING

SQL Basics – BornToDev, Certificate
Automating Pipelines with Jenkins (CI/CD) – Technical Training
Code Quality & Security Gate with SonarQube – Technical Training
Web Security Implementation (OWASP Top 10) – Technical Training
API Gateway and Software Architecture Fundamentals (Kong API Gateway) – Certificate

ACADEMIC PROJECTS

Store mate (Senior Project – E-Commerce Platform) 12/2025 – Present

- Project Description:** Developed a full-stack e-commerce web application as part of a 4-person team, featuring product listings, shopping cart functionalities, and checkout systems.
- Roles & Responsibilities (Frontend Focus):**
- Led the frontend development, building **core multi-page views** and ensuring **100% Responsive Mobile layouts** for an optimal user experience across all devices.
- Implemented and integrated the **Stripe API** on the client side to handle secure and seamless checkout payment flows.
- Developed the **notification system** (including LINE OA integration) to provide users with instant updates on order and payment status.

- Managed complex UI states for shopping carts and utilized Swagger to ensure precise data integration with backend services.

MERN Chat (Real-time Chat Application)

- **Project Description:** Built a real-time messaging web application featuring user online status tracking and active session management.
- **Roles & Responsibilities (Frontend Focus):**
- Developed and optimized a responsive Chat UI ensuring real-time responsiveness across multiple device screen sizes.
- Handled frontend UI state alongside Socket.io  integration to instantly reflect active user connection status changes.
- Conducted integration and end-to-end testing to verify UI responsiveness under heavy simulated traffic.
